

FEATURES

- Heat treated, high carbon steel for longer service life
- Protective surface coating resists rust and corrosion
- Laser engraved with safety and application information
- BESS System specified sharpness

FCS16-1050 RIP-R-STRIPPER® SCORING BLADE

The FCS16-1050 Scoring Blade was designed specifically for removing VCT and sheet-type floor covering materials in high traffic areas from concrete surfaces. Over time, high traffic areas or those areas where weight (filing cabinets, etc.) has been applied can significantly increase the material bond strength. This increase can require a substantially higher cutting force for achieving productive material removal rates. The only productive solution with a manually propelled tile stripper is to reduce blade width for increasing the cutting force. The blade features a 3-inch cutting width with additional side scoring wings that slice linoleums and glued-down carpets into manageable strip widths. Designed for use with all General manually propelled tile strippers as well as a variety of competitive products.

SPECIFICATIONS

Floor Material Use	Cement Only
Material	High-carbon, cold-finished steel
Heat Treatment	Quench and draw
Sharpness Specification	BESS 350 maximum
Dimensions	4 inches (102mm) L x 6 inches (152 mm) W
Weight	0.4 lbs (0.2 kg)
