

FEATURES

- Uniform segment wear rates
- Individually replaceable segments
- Directionally marked for longer segment life
- Omnitrix™ matrix formulation for multi-purpose grinding applications

DIAM-A-TACH™ DIAMOND SEGMENT GRINDING SYSTEM

The DIAM-A-TACH Diamond Segment Grinding System offer innovative solutions for a wide variety of surface preparation job applications. The Omnitrix formulation is a general purpose, aggressive matrix used on green concrete, high tensile epoxies, many thin-film coatings and fully cured concrete. The Omnitrix formulation will normally produce swirl marks in the surface.

The inherent advantage of a circular, offset configuration is that the diamond segments wear evenly, providing maximum service life and ROI. The same cannot be said for any rectangular-shaped segment configuration where the leading and trailing segments normally wear at accelerated rates. The housing is marked for proper orientation to eliminate the top layer of tails from being inadvertently removed. Secures tight with a plastic wedge.

Use the DIAM-A-TACH Diamond Segment Grinding System with General SG12 and SG24 Legacy Series Surface Grinders along with popular models of competitive single and dual head products.

SPECIFICATIONS

Segments Per Unit	3
Segment Grit/Bond Combination	OmniTrix: 30/40
Grinding Area Per DIAM-A-TACH Unit	2.36 in ² (1522 mm ²)
Attachment Configuration	Wedge, plastic
Grinding Segment Dimensions (L x W x H)	1.0 inch (25.4 mm) diameter x 0.45 inch (11.4 mm) H
Product Dimensions Per Unit (L x W x H)	4.0 x 2.0 x 2.1 inches (101.6 x 50.8 x 54.1 mm)
Product Weight	3.7 lbs (1.7 kg), each
